DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 1/16/04 has been considered.

Priority

2. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in France on 12/4/02. It is noted, however, that applicant has not filed a certified copy of the French application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art in view of Farrington et al (6,459,600).

Applicant's admitted prior art Fig. 1 discloses the claimed invention except for the controllable rectifier with the two transistors connections. Farrington et al. teach a controllable rectifying element in Figs. 1, 2 and 5. A bipolar transistor (SQ1), first switch (SQ3), second switch (SQ4) and control circuit (52). See col. 6, line 12 to col. 8, line 55. It would have been obvious to one having ordinary skill in the art at the time of the invention to provide a rectifying element as taught by Farrington et al. in Applicant's admitted prior art in order to overcome paralleling problems with synchronous rectifier.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
